EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicants' representative, Robert Goodell on November 20, 2006.

The application has been amended as follows: in claim 5, as amended by preliminary amendment on January 25, 2005, in *line 3, pimelic acid* has been deleted.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the instant claims are drawn to a method for producing a carboxylic acid by oxidizing an oily alcohol or oily ketone with hydrogen peroxide in the presence of a metal compound. The closest prior art of record, i.e., references listed on PTO-1449 forms, teach such a process being conducted in a homogeneous reaction system. The closest prior art fails to teach or fairly suggest conducting said reaction using a heterogeneous reaction system, which is shown in the instant specification to provide unexpectedly higher yield and selectivity to the carboxylic acid than the homogeneous reaction system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
